Completed
December 2014

Builder
Maben

Architect
i2C Architects

Location
Janefield Dr, Bundoora

// University Hill, Bundoora

Heritage Glass had substantial involvement in this newly developed shopping precinct, including external glass fins – over 1000sqm of internal shopfronts and over 300sqm of external entry glazing were installed by the team.

During the second stage of this project, works were completed around public access which created challenges, in particular when installation of glass panels up to 4200mm H x 1800mm W and glass fins up to 4100mm H x 300mm W and 19mm thick were scheduled for installation.

Heritage Glass installed oversized panels as a design feature to meet the design intent of 'unobstructed views'. The entrance features automatic telescopic doors which were also installed by the team.
